

Enterprise Recon 2.11 Now Available

Introducing new global filter templates

We're excited to let you know that the latest version of Enterprise Recon is [now available](#) to customers. This release introduces new global filters templates and several UI enhancements.

Key Features of Enterprise Recon 2.11.0

The key features and benefits introduced in Enterprise Recon 2.11.0 include:

- **New global filters templates:** Out-of-the-box global filters for enhanced accuracy of scan results, and the ability to enable/disable previously applied filters.
- **Support for new platforms:** Scanning support is now available for Oracle Linux 8 and FreeBSD 14.
- **New and improved data types:** Updates include the addition of new Canadian driver's license numbers and enhanced support for Portuguese Fiscal Numbers and Citizen's Cards, and US Individual Tax Identification Numbers (ITIN).
- **UI enhancements:** Targets and target groups filter and schedule manager filter updates.

For more information about the latest update, full release notes are included in the [Enterprise Recon 2.11.0 User Guide](#).

Customers can download Enterprise Recon 2.11.0 now from the [Ground Labs Services Portal](#).
