EOS platform deprecation notice

Enterprise Recon 2.13

As we continue to develop Enterprise Recon and bring new features and extend support for more platforms and data types, we will be retiring support for some end-of-life systems in upcoming releases.

The following software and platforms will be removed from Enterprise Recon in version 2.13 (expected mid-2025).

Platform	Deprecated versions
macOS	● macOS 12 Monterey
Database	● MySQL 5.7 and older ● Oracle Database 18c and older
Email	● Exchange Server 2013
Servers	**Confluence on-premises** ● Confluence Data Center 7.4 LTS ● Confluence Data Center 7.19 LTS **SharePoint** ● SharePoint Server 2013
Network storage (Hadoop)	● Apache Hadoop 2.8.0 and older (Apache Hadoop 2.7.3)

These changes mean that we will no longer test Enterprise Recon against these platforms. No future bug fixes will be released for deprecated platform versions.

While Enterprise Recon may continue to work with these platforms, we cannot ensure support nor guarantee their ongoing compatibility.
